### Vehicle Description

*A masterpiece of minimalist design, the 1948 2CV was made from mostly flat stamped panels, was cheap and easy to repair and held together with just 16 bolts!*

*The roof and (initially) the boot lid were made of canvas. Even after the original 375cc air-cooled flat-twin had grown to 425cc and then 602cc, performance still remained modest at around 70mph flat-out, not that this was of any concern to the majority of it's devotees for whom the roomy interior, full-length sunroof and frugal fuel consumption were of far greater importance.*

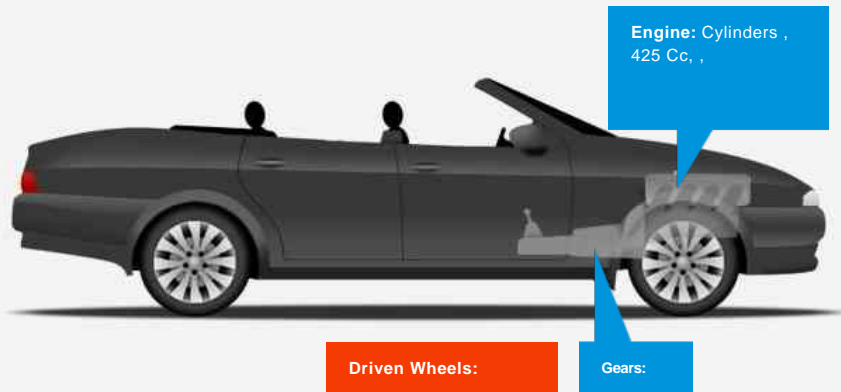

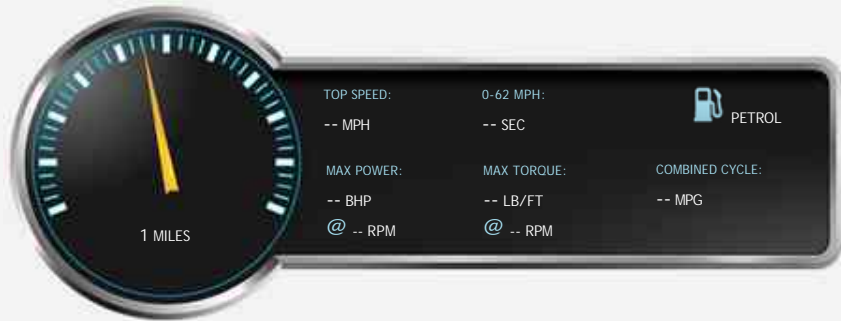

*It was a massive success, transforming the lives of the rural poor and over 3.8 million examples were sold before production finally came to an end in 1990.*
